

Dear Friends,

We are pleased to announce our partnership with Exton Granite Calibration Services, Inc. effective June 5, 2009. Our company is proud that Mary Anne Whitehead selected us to carry on the work that she and her husband, Bill, began over 25 years ago.

We are aware that Exton Granite may have serviced the surface plates for your company in the past. It is our intent to seamlessly transition this work into the existing service we provide for you. Edward Thron, Jr., Senior Surface Plate Technician for Exton Granite, has joined the Garber team and will continue to deliver surface plate calibration and resurfacing services for us. Garber Scale and Calibration already had a great deal of experience in providing surface plate calibration, and now our acquisition of Exton Granite makes that segment of our business even more robust.

Garber Scale & Calibration is an ISO 9001 registered firm accredited to ISO/IEC 17025 and ANSI Z540-1, and follows federal specification GGG P 463 for Granite Surface Plate resurfacing and calibration.

Please call us at 1-800-427-3032 or 717-393-1708 to schedule an appointment or if you would like additional information.

The entire Garber Scale & Calibration team is excited about our new partnership with Exton Granite, and we look forward to a long and mutually rewarding relationship with your company!

Sincerely,

Jay A. Garber
President
